

C programming Assignment 8

Aayush Shethiya

August 2025

```
#include <stdio.h>

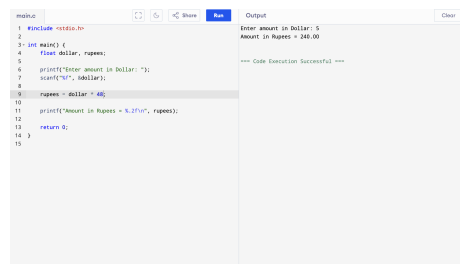

int main() {
    float dollar, rupees;

    printf("Enter amount in Dollar: ");
    scanf("%f", &dollar);

    rupees = dollar * 48;

    printf("Amount in Rupees = %.2f\n", rupees);

    return 0;
}
```

A screenshot of a code editor window titled 'main.c'. The code is a C program that takes a dollar amount as input and outputs the equivalent rupee amount. The code is as follows:

```
1 #include <stdio.h>
2
3 int main() {
4     float dollar, rupees;
5
6     printf("Enter amount in Dollar: ");
7     scanf("%f", &dollar);
8
9     rupees = dollar * 48;
10
11     printf("Amount in Rupees = %.2f\n", rupees);
12
13     return 0;
14 }
15
```

The right side of the window shows the output: 'Enter amount in Dollar: 5' followed by 'Amount in Rupees = 240.00'. Below the output, it says '*** Code Execution Successful ***'. The 'Run' button is highlighted in blue.
